## INCREMENT OF POPULATION.

The following table represents accurately the increase in the commerce and population of the Christian world during the last seventeen years. It is of great interest on account of its bearing upon the questions whether the population multiplies too fast for the good of the race, and whether the general comfort of the individual is being increased or decreased:—

	FOREIGN COMMERCE.		POPULATION.	
	1855.	1872.	1855.	1872.
Great Britain	£268,400,000	£609,600,000	27,620,000	32,000,000
France	150,300,000	285,900,000	35,750,000	36,100,000
United States	107,340,000	232,500,000	27,000,000	41,000,000
Belgium	69,000,000	199,800,000	4,530,000	5,100,000
Germany, imp'ts only	53,200,000	100,000,000	33,500,000	39,400,000
Austria	26,000,000	89,400,000	36,500,000	35,900,000
Russia in Europe	45,400,000	103,000,000	65,000,000	71,000,000
Italy	32,200,000	27,800,000	18,850,000	27,000,000
Spain	32,500,000	15,900,000	15,900,000	16,370,000
Netherlands	54,000,000	88,000,000	3,430,000	3,650,000
Sweden	9,000,000	14,600,000	3,600,000	4,100,000
<b>Total</b>	<b>£848,940,000</b>	<b>£1,855,200,000</b>	<b>271,443,000</b>	<b>311,620,000</b>
Increase in seventeen years (commerce)				118.5 per cent.
Increase in seventeen years (population)				14.8 per cent.
Foreign commerce in 1855 per head of population			£3.13	
Foreign commerce in 1872 per head of population			£5.95	
Increase per cent				90

The most striking deduction to be made from this table is not the great increase of commerce, but the fact that in seventeen years the amount for each individual has nearly doubled. There has been a slow growth in the number of the people, but a very rapid growth in the commerce. Commerce is an index of wealth, and increase of wealth means, in the highest degree, augmentation of physical comforts and well-being.
